Singapore, January 18, 2012 -- Moody's Investors Service has today upgraded the Government of Indonesia's foreign and local currency bond ratings to Baa3 from Ba1.

The ratings outlook is stable.

The key drivers of this decision are:

1. Moody's anticipation that government financial metrics will remain in line with Baa peers.
2. The demonstrated resilience of Indonesia's economic growth to large external shocks.
3. The presence of policy buffers and tools that address financial vulnerabilities.
4. A healthier banking system capable of withstanding stress.

RATIONALE FOR THE UPGRADE TO Baa3

Indonesia's cyclical resilience to large external shocks points to sustainably high trend growth over the medium term. A more favorable assessment of Indonesia's economic strength is underpinned by gains in investment spending, improved prospects for infrastructure development following key policy reforms, and a well-managed financial system.

In addition, robust growth has been accompanied by the continued health of its external payments position, supported by increasingly large flows of foreign direct investment, while inflationary expectations are becoming better anchored at a more stable and historically lower level.

Prudent fiscal management has contained budget deficits at very low levels and has reduced the government's debt burden as a share of GDP.

As a result, Indonesia's fiscal ratios now surpass many of its higher-rated peers, providing more fiscal headroom to respond to economic shocks. It has also reduced risk perceptions, enabling the government to access international funding markets even during periods of heightened risk aversion.

Policy buffers, including the central bank's large stock of foreign exchange reserves and the government's bond stabilization framework, have been recently deployed and remain ample as significant lines of defense against destabilizing capital outflows. In addition, the banking sector does not pose immediate or significant contingent risks to the government's balance sheet, thereby raising fiscal headroom and added scope to policy responsiveness to future shocks.

Issues related to governance and a fundamental assessment of institutional strength remain a concern in regard to a further improvement in Indonesia's credit fundamentals. In addition, continued progress on targeted subsidy reform would be credit positive.

The stable outlook also reflects the expectation of continued policy flexibility and the adept management of risks stemming from global financial market volatility, based in turn on the tepid recovery in the US and the ongoing sovereign debt stress apparent in the euro zone.
Indonesia's long-term foreign currency (FC) bond ceiling was also raised to Baa2 from Baa3, while the long-term FC deposit ceiling was aligned with the government bond rating at Baa3. In addition, the short-term FC bond and deposit ceilings were upgraded to P-3. The outlook for these ceilings is stable. These ceilings act as a cap on ratings that can be assigned to the FC obligations of other entities domiciled in the country.

The local currency bond and deposit ceilings were also upgraded to A3 from Baa1.

WHAT COULD CHANGE THE RATING--UP

The following factors could lead to an upgrade: Increased fiscal space resulting from improved revenue mobilization; continued health of the country’s balance of payments and the financial system, coupled with a longer track record of monetary and price stability; sustained progress in addressing infrastructure bottlenecks that contribute to an increase in potential growth; or a gradual deepening of local capital and credit markets to support the onshore finance-ability of the government's borrowing requirements.

WHAT COULD CHANGE THE RATING--DOWN

The following factors could lead to a downgrade: Sustained loss of inflation control and monetary stability; or a large shock to the country’s fiscal, debt and foreign currency reserve position, derived, for instance, from policy mismanagement, or some other domestic political shock, which results in a deep deterioration of resident and investor confidence.

METHODOLOGY

The principal methodology used in this rating was Sovereign Bond Ratings published in September 2008. Please see the Credit Policy page on www.moodys.com for a copy of this methodology.

REGULATORY DISCLOSURES

Although this credit rating has been issued in a non-EU country which has not been recognized as endorsable at this date, this credit rating is deemed "EU qualified by extension" and may still be used by financial institutions for regulatory purposes until 30 April 2012. Further information on the EU endorsement status and on the Moody's office that has issued a particular Credit Rating is available on www.moodys.com.

For ratings issued on a program, series or category/class of debt, this announcement provides relevant regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody’s rating practices. For ratings issued on a support provider, this announcement provides relevant regulatory disclosures in relation to the rating action on the support provider and in relation to each particular rating action for securities that derive their credit ratings from the support provider’s credit rating. For provisional ratings, this announcement provides relevant regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moodys.com.

Information sources used to prepare the rating are the following: parties involved in the ratings, parties not involved in the ratings, public information, and confidential and proprietary Moody's Investors Service information.

Moody’s considers the quality of information available on the rated entity, obligation or credit satisfactory for the purposes of issuing a rating.
Moody's adopts all necessary measures so that the information it uses in assigning a rating is of sufficient quality and from sources Moody's considers to be reliable including, when appropriate, independent third-party sources. However, Moody's is not an auditor and cannot in every instance independently verify or validate information received in the rating process.

Please see the ratings disclosure page on www.moodys.com for general disclosure on potential conflicts of interests.

Please see the ratings disclosure page on www.moodys.com for information on (A) MCO's major shareholders (above 5%) and for (B) further information regarding certain affiliations that may exist between directors of MCO and rated entities as well as (C) the names of entities that hold ratings from MIS that have also publicly reported to the SEC an ownership interest in MCO of more than 5%. A member of the board of directors of this rated entity may also be a member of the board of directors of a shareholder of Moody's Corporation; however, Moody's has not independently verified this matter.

Please see Moody's Rating Symbols and Definitions on the Rating Process page on www.moodys.com for further information on the meaning of each rating category and the definition of default and recovery.

Please see ratings tab on the issuer/entity page on www.moodys.com for the last rating action and the rating history.

The date on which some ratings were first released goes back to a time before Moody's ratings were fully digitized and accurate data may not be available. Consequently, Moody's provides a date that it believes is the most reliable and accurate based on the information that is available to it. Please see the ratings disclosure page on our website www.moodys.com for further information.

Please see www.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.
